Welcome To Java

Welcome to the world of Java!

In this challenge, you will learn how to print “Hello World!” in standard output (stdout).

Complete the code by copying the two lines of code below and pasting them inside the body of your main method.

For Java:

```
System.out.println("Hello, World.");
```

```
System.out.println("Hello, Java.");
```

For C++:

```
cout<<"Hello, World.\n";
```

```
cout<<"Hello, Java.";
```

For Python:

```
print("Hello, World.")
```

```
print("Hello, Java.")
```

Input Format

There is no input for this challenge.

Output Format

You must print two lines of output:

Print "Hello, World." on the first line (without quotes).

Print "Hello, Java." on the second line (without quotes).

Sample Output

```
Hello, World.
```

```
Hello, Java.
```

Common Mistakes -

- Make sure you match the exact output required in question, taking care of commas, spaces and full stop exactly.
- Make sure you use S(capital) in `System`

My code

```
// in java
import java.util.*;
import java.lang.*;
import java.io.*;
```

```
public class Main
{
    public static void main (String[] args) throws java.lang.Exception
    {
        System.out.println("Hello, World.");
        System.out.println("Hello, Java.");
    }
}
```
