## Switch Case Problem 1

---

You are given a positive integer  $N$ . Write a program using `switch case` to print the following output such that :

If the case is 55 , print "Study is important" ,

Otherwise , print "No value" .

### Input Format

First line contains an integer  $N$ .

### Output Format

Print the sentence related to the integer as per description.

### Example 1

Input

55

Output

Study is important

### Example 2

Input

24

Output

No value

## Constraints

$1 \leq N \leq 10^6$

# My code

```
// n java
import java.util.*;
import java.lang.*;
import java.io.*;

public class Main
{
    static void fun(int n)
    {
        switch(n)
        {
            case 55 : System.out.print("Study is
important");
                    break ;
            default: System.out.print("No value");
        }
    }
}
```

```
    }  
    public static void main (String[] args) throws  
java.lang.Exception  
    {  
        //your code here  
        Scanner s=new Scanner(System.in);  
        int n=s.nextInt();  
        fun(n);  
    }  
}
```
