EASY

Max Score: 30 Points

Java Override 1

Override the Person class's speak function inside the Student class. Make the function print "I'm a student".

Note:- Your task is to write your code in the part specified in the driver code. Do not change other parts of the driver code.

Input Format

There is no input.

Output Format

The output contains the lines as specified in the examples.

Example 1

Output

```
I'm a student
```

Topic Tags

OOP

My code

```
// in java
class Person
{
    public void speak()
    {
        System.out.println("I'm a person");
    }
}

class Student extends Person
{
    // ADD CODE HERE
    public void speak()
    {
        System.out.println("I'm a student");
    }
}

public class Main{
    public static void main(String[] args)
    {
        Person p1 = new Student();
        p1.speak();
    }
}
```
